### RSVP to the Event

In today's highly regulated financial system, launching new products and financial services businesses can be extremely challenging. To facilitate innovation and entry, some jurisdictions have created regulatory sandboxes — supervised halfway houses in which firms can test new products without being subject to the full burden of compliance with existing rules.

The Consumer Financial Protection Bureau (CFPB) recently announced such a program for U.S. consumer finance firms. The sandbox promises to increase innovation and lower costs for financial services used particularly by lower-income Americans. Yet there are concerns, on one hand, that sandboxes reduce consumer protection and, on the other hand, that they do not go far enough in addressing the challenge of excessive regulation.

The Cato Institute is pleased to welcome Paul Watkins, director of the Office of Innovation at the CFPB, to outline the Bureau's new sandbox policy and revised No-Action Letter policy. Watkins, who pioneered the use of sandboxes at the Arizona Attorney General's Office, will explain how the bureau's approach can encourage greater innovation in consumer finance. Eric Mogilnicki, a partner at Covington & Burling LLP, Conan French a senior advisor for Innovation and Fintech at the Institute for International Finance, and Diego Zuluaga, policy analyst at the Cato Institute's Center for Monetary and Financial Alternatives, will comment. Professor Todd Zywicki, a Cato senior fellow, will moderate.

## RSVP to the Event

The Trump administration has emphasized the reemergence of great power competition as the organizing principle for U.S. foreign policy. What scholarship should inform its understanding of how to compete with China and Russia? And how will international relations change in an era when new actors are challenging the status quo?

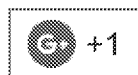

The history of great power politics can provide some clues. Over time, states have risen above rivals and fallen to new challengers—but the transitions have not always been disastrous, nor even violent. Some states have successfully managed their decline, while others have resorted to aggressive posturing, or even war, to try to maintain their status at all costs.

Join us as four distinguished scholars discuss their recent work on the history and future of great power relations.

The American Petroleum Institute invites you to  
**The 2019 State of American Energy luncheon – celebrating Generation Energy**

We are in the midst of Generation Energy. More natural gas and oil is produced in the United States than any other country in the world. At the same time, U.S. carbon dioxide emissions are at their lowest levels in a generation, largely because of the growing role played by clean natural gas. Our industry is an economic engine, supporting 10.3 million jobs – to produce, deliver and refine natural gas and oil – as well as jobs associated with energy development and the personal spending of our workers.

Guided by smart policies and regulations that unleash innovation and progress, natural gas and oil are playing a powerful role in America's economic progress and will for generations to come.

Join me and industry leaders from coast to coast at the 2019 State of American Energy luncheon.

Sincerely,

MIKE SOMMERS  
President and CEO, API

SAVE THE DATE *for*

## *Macro Musings LIVE*

Tuesday, January 15, 2019 • 4:30PM ET

Cato Institute, 1000 Massachusetts Ave., NW, Washington, D.C.

**REGISTER**

---

### About the Event

The Mercatus Center's **David Beckworth** comes to Cato for a live recording of his popular *Macro Musings* podcast, interviewing George Selgin about his new book *Floored!: How a Misguided Fed Experiment Deepened and Prolonged the Great Recession*. *Floored!* is the first comprehensive account of the Federal Reserve's new post-crisis "floor" monetary policy operating system. Clocking his fourth *Macro Musings* episode, Selgin will share his three-year research journey into this new experimental system, how the Fed stumbled into it, and its consequences for the economy—including how it could turn the Fed into a Trojan piggybank of fiscal profligacy.

---

## Schedule

### 4:30-5:30PM PODCAST INTERVIEW

David Beckworth, Senior Research Fellow and Director of Monetary Policy Project,  
Mercatus Center at George Mason University

George Selgin, Author, *Floored!: How a Misguided Fed Experiment Deepened and Prolonged the Great Recession* and Director, Center for Monetary and Financial Alternatives, Cato Institute

### 5:30-5:45PM Q&A SESSION

### 5:45PM RECEPTION

---

## Praise for *Floored!*

*"Floored!* gives an extraordinarily clear exposition of how the Fed sets the policy interest rate either by using the market or by administering interest on excess reserves. It thereby reveals the monetary distortions caused by circumventing the market. George Selgin's advice should be read carefully by the Fed and followed."

*– John B. Taylor, Stanford University*

The Cato Institute invites you to a Special Conference  
**2018 Cato Institute Surveillance Conference**

Friday, December 14, 2018 • 9:00AM – 5:30PM  
Cato Institute, 1000 Massachusetts Ave, NW Washington, DC 20001

[DETAILS & REGISTRATION](#)

The legendary spymaster James Jesus Angleton called the world of intelligence a “wilderness of mirrors,” and rarely has that description seemed as apt as it does in 2018. President Donald Trump rails against a “deep state” embedded within the very intelligence agencies over which he now presides—even as former intelligence leaders claim that it’s Trump who has sought to politicize intelligence. In *U.S. v. Carpenter*, the Supreme Court handed down a seminal Fourth Amendment ruling that could dramatically reshape electronic privacy law—but what it will mean in practice remains radically uncertain. Meanwhile, technology companies ranging from social media platforms to manufacturers of the connected devices that constitute the “Internet of Things” have struggled with how to balance users’ privacy against their own business interests and the surveillance demands of governments around the world.

Join the Cato Institute—and an array of top experts, technologists, and policymakers—for a probing examination of these issues and many more as we seek to navigate the wilderness.

**Speakers include:**

- **Michael Glennon**, Tufts University
- **Susan Hennessy**, Brookings Institution & Lawfare
- **Andrew Ferguson**, Clarke Law School, University of the District of Columbia
- **Heather West**, Mozilla
- **Rachel Levinson-Waldman**, Brennan Center
- **Jennifer Daskal**, Washington College of Law, American University
- **Spencer Ackerman**, *The Daily Beast*
- **Hannah Quay-de la Vallee**, Center for Democracy and Technology

**Panels include:**

- **Donald Trump and the “Deep State”**
- **Reporting in an Era of Surveillance**
- **Panopticon of Things — Networked Appliances as Surveillance Tools**

---

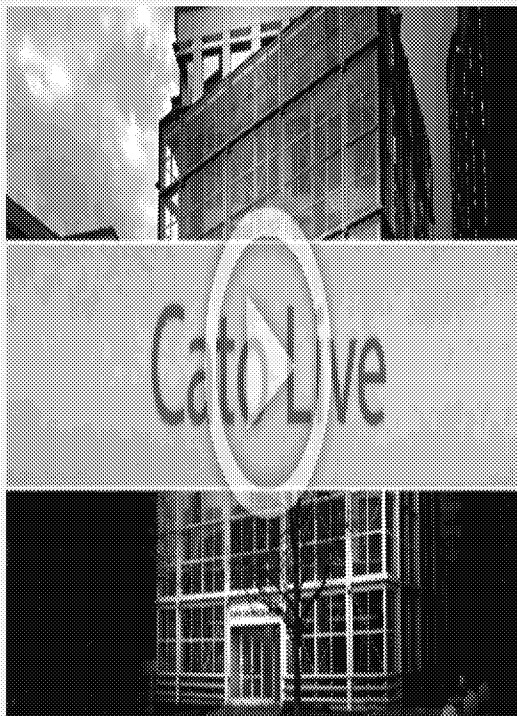

**This Cato Conference and reception are free of charge.**

To register to attend this event, click the button below and then submit the secure web form by 9:00AM EST on Thursday, December 13, 2018. If you have any questions pertaining to registration, you may e-mail [events@cato.org](mailto:events@cato.org).

The Cato Institute invites you to a Conference

## **The Jones Act: Charting a New Course after a Century of Failure**

Thursday, December 6, 2018 • 9:00AM – 5:00PM EST  
Cato Institute, 1000 Massachusetts Ave., NW, Washington, D.C.

## DETAILS & REGISTRATION

For nearly 100 years the Jones Act has restricted the transportation of cargo between two points in the United States to ships that are U.S.-built, crewed, owned, and flagged. Meant to bolster the U.S. maritime industry and provide a ready supply of ships and mariners in times of conflict, the act has instead presided over a steady deterioration in the number of ships, sailors to crew them, and shipyards to build them. While failing to provide its promised benefits, the law has imposed a huge economic burden that manifests itself in various ways, ranging from higher transportation costs to increased traffic and pollution. This full-day conference examines these costs in greater detail, discusses the validity of the Jones Act's national security argument, and evaluates options for reform.

### Session I: The Jones Act: A Burden America Can No Longer Bear

- **Daniel Griswold**, Senior Research Fellow & Co-Director of Trade and Immigration, Mercatus Center
- **Manuel Reyes**, Executive Vice-President/CEO, Puerto Rico Food Marketing, Industry and Distribution Chamber (MIDA)
- **Bryan Riley**, Director, Free Trade Initiative, National Taxpayers Union
- Moderator: **Colin Grabow**, Policy Analyst, Herbert A. Stiefel Center for Trade Policy Studies, Cato Institute

### Session II: The Economic Costs of the Jones Act

- **James W. Coleman**, Professor, Dedman School of Law, Southern Methodist University
- **Jennifer Danner Riccardi**, Senior Trade Advisor, Delegation of the European Union to the United States
- **Ted Loch-Temzelides**, Professor of Economics, Rice University
- **Rockford Weitz**, Professor of Practice, Entrepreneur Coach & Director, Maritime Studies Program, The Fletcher School of Law and Diplomacy, Tufts University
- Moderator: **Daniel J. Ikenson**, Director, Herbert A. Stiefel Center for Trade Policy Studies, Cato Institute

### Session III: National Security and the Maritime Industry

- **Steve Ellis**, Vice President, Taxpayers for Common Sense
- **Nick Loris**, Herbert and Joyce Morgan Fellow in Energy and Environmental Policy, Center for Free Markets and Regulatory Reform, Heritage Foundation
- **Robert Quartel**, CEO & Chairman, NTELX
- Moderator: **Christopher A. Preble**, Vice President, Defense and Foreign Policy Studies, Cato Institute

#### **Session IV: Charting a New Course: Options for Jones Act Reform**

- **Keli'i Akina**, President & CEO, Grassroot Institute of Hawaii
- **Thomas Grennes**, Professor of Economics Emeritus, North Carolina State University
- **Howard Gutman**, Former U.S. Ambassador to Belgium and Managing Director, the Gutman Group
- **Michael Hansen**, President, Hawaii Shippers Council
- Moderator: **Inu Manak**, Visiting Scholar, Herbert A. Stiefel Center for Trade Policy Studies, Cato Institute

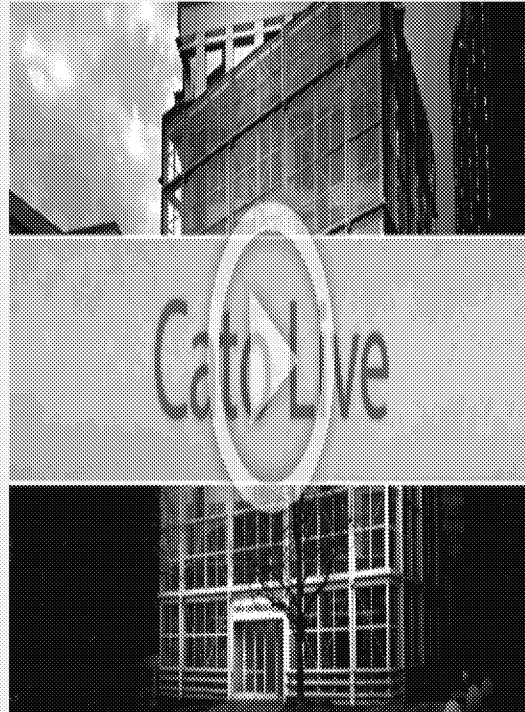

**This Cato Conference is free of charge.**

[Actual Sender is [messages@public.govdelivery.com](mailto:messages@public.govdelivery.com)]

The U.S. Environmental Protection Agency (EPA) is announcing its call for nominations for the 2019 Green Chemistry Challenge Awards. The awards recognize companies or institutions that have developed a new process or product helping to protect public health and the environment.

Nominations for innovative technologies featuring greener chemicals and products are due to the Agency by January 15, 2019. Since the inception of the program, EPA has received more than 1,700 nominations and presented awards to developers of 114 technologies. Green chemistry is the design of chemical products and processes that reduce the generation and use of chemicals that are hazardous to the environment and people's health.

Instructions on submitting entries and information on past winners can be found at  
<http://www.epa.gov/greenchemistry>

**Subject:** You're Invited to API's State of American Energy 2019

The American Petroleum Institute invites you to  
**The 2019 State of American Energy luncheon – celebrating Generation Energy**

We are in the midst of Generation Energy. More natural gas and oil is produced in the United States than any other country in the world. At the same time, U.S. carbon dioxide emissions are at their lowest levels in a generation, largely because of the growing role played by clean natural gas. Our industry is an economic engine, supporting 10.3 million jobs – to produce, deliver and refine natural gas and oil – as well as jobs associated with energy development and the personal spending of our workers.

Guided by smart policies and regulations that unleash innovation and progress, natural gas and oil are playing a powerful role in America's economic progress and will for generations to come.

Join me and industry leaders from coast to coast at the 2019 State of American Energy luncheon.

Sincerely,

MIKE SOMMERS  
President and CEO, API

The Cato Institute invites you to a Special Conference  
**2018 Cato Institute Surveillance Conference**

Friday, December 14, 2018 • 9:00AM – 5:30PM  
Cato Institute, 1000 Massachusetts Ave, NW Washington, DC 20001

[DETAILS & REGISTRATION](#)

The legendary spymaster James Jesus Angleton called the world of intelligence a “wilderness of mirrors,” and rarely has that description seemed as apt as it does in 2018. President Donald Trump rails against a “deep state” embedded within the very intelligence agencies over which he now presides—even as former intelligence leaders claim that it’s Trump who has sought to politicize intelligence. In *U.S. v. Carpenter*, the Supreme Court handed down a seminal Fourth Amendment ruling that could dramatically reshape electronic privacy law—but what it will mean in practice remains radically uncertain. Meanwhile, technology companies ranging from social media platforms to manufacturers of the connected devices that constitute the “Internet of Things” have struggled with how to balance users’ privacy against their own business interests and the surveillance demands of governments around the world.

Join the Cato Institute—and an array of top experts, technologists, and policymakers—for a probing examination of these issues and many more as we seek to navigate the wilderness.

*Details on speakers and agenda will be available in the near future.*

Ryan,

Finding solutions re plastic waste and marine debris is an important priority for Dow. We would love to collaborate with EPA in any way possible to address the issue. I will have a couple of executives in town on Oct 15-16 and I would love to meet with you and your leadership team, including Nancy Beck, Chad Macintosh and Steve Cook. Looking for 30 minutes if possible.

Thank you for your consideration. Dennis

Dear Nancy and Anita,

I hope all is well. It was nice to spend time with both of you in Seoul. I am still recovering and am convinced the jet lag is only getting worse, not better.

Steve and I are sorry that you missed our presentation, so as promised, I am attaching our slides. I also have asked for an electronic copy of the slides presented by the Denmark Consumer Council on their ingredient disclosure application. Once I have it, I will forward it along.

All the best,  
Komal

July 26, 2018

OFFICE OF CHEMICAL SAFETY  
AND POLLUTION PREVENTION

Karluss Thomas  
American Chemistry Council  
Silicones Environmental Health, and Safety Center

Dear Mr. Thomas,

Thank you for your March 28, 2018 letter regarding the completion of a risk evaluation for Octamethylcyclotetrasiloxane (D4).

Under amended TSCA, EPA is now directed to evaluate existing chemicals for unreasonable risk of injury to health or the environment. The law mandates the process by which EPA must evaluate existing chemicals, and the timelines for which these actions must be completed. The first step is a 9- to 12-month prioritization process involving risk-based screening of hazard and exposure potential to determine if the chemical is high- or low-priority for risk evaluation. If the chemical is designated as high-priority, it moves directly into risk evaluation, where within three and a half years, EPA must determine if the chemical presents an unreasonable risk of injury to health or the environment under the conditions of use. By statute, EPA must have 20 high-priority risk evaluations ongoing by December 2019; therefore, EPA plans to begin prioritization between December 2018 and March 2019. EPA is in the process of determining how chemicals will be selected for prioritization. If D4 were to be one of the first chemicals selected for prioritization, and if it were determined to be a high-priority chemical, a risk evaluation would be completed no later than June 2023.

An alternative route for a chemical to be evaluated for risk is the TSCA provision under which manufacturers may request that a chemical they manufacture undergo an EPA-conducted risk evaluation. The final risk evaluation rule (Procedures for Chemical Risk Evaluation Under the Amended Toxic Substances Control Act, 82 FR 33726, June 22, 2017), defines the form and manner under which these requests must be made to the Agency, along with EPA's process to accept a request and begin the risk evaluation. If a request is granted, the Agency will begin the risk evaluation, which must be completed within three and a half years. This method bypasses the 9- to 12-month prioritization process. Note that EPA will not initiate a manufacturer requested risk evaluation until the finalization of the fees rule.

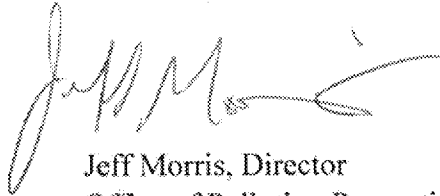

Additionally, you could provide a draft risk evaluation with, or without, a manufacturer request for risk evaluation. On June 22, 2017 EPA published guidance to assist interested persons in developing and submitting a draft risk evaluation. EPA would consider this draft risk

evaluation as reasonably available information to be considered, along with other information, in an EPA-conducted risk evaluation.

You cite TSCA section 26(p)(2), which allows the Agency to initiate, continue, or complete a risk evaluation prior to the completion of policies, procedures and guidance required, as a mechanism by which a risk evaluation on D4 could be expedited. You note that 40 CFR 702.35 states that risk evaluations initiated prior to the effective date of the rule will be conducted in accordance with the rule to the maximum extent practicable. However, although EPA has received information through implementation of the enforceable consent agreement, OCSPP has not initiated a D4 risk assessment.

Thank you for your letter.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeff Morris", with a stylized flourish extending to the right.

Jeff Morris, Director  
Office of Pollution Prevention and Toxics

Glenn,

Thank you for the invitation. This seems like a great group to meet with and I'd like to make this work if its in the realm of possible. We are in the midst of figuring out schedules for early September and hope to be able to get back to you shortly with a solid answer.

Regards,

Nancy

**Subject:** ACS Chief Technology Officer Summit - September 12 & 13

Nancy:

I hope this note finds you well.

Tom Connelly and I may have mentioned to you when we visited earlier this year that ACS has been convening industry chemistry sector Chief Technology Officers for a day and a half meeting here in Washington, DC for the past three years. This year the CTO Summit will be September 12 & 13 at The Capital Hilton, 1001 16th St NW.

We start the first day with one-on-one meetings between the CTOs, have an evening reception and then the following day a program of speakers, etc. We usually involve Members of Congress, federal agency representatives, as well as leaders from other science organizations, embassies, trade associations etc. So far the following companies have confirmed their attendance – Air Liquide, Ascend, BASF, Dow, Dupont, Evonic, FMC, FXI, GE Global Research, GCP Technologies, Grasim Industries, Honeywell, PPG, Procter & Gamble, Royal DSM, Solvay, W.L. Gore. We are still awaiting answers from over a dozen other companies. Attached is the CTO Summit program agenda book from last year to give you a better sense of participants, program, etc.

I am reaching out to you to see if you would agree to be the lunch speaker on Wednesday, September 13. The time slot for lunch is 12:00 – 1:30 PM, and our format is typically 30 minutes of presentation followed by 15 minutes of Q&A. I know the CTOs would value learning more about EPA's new approaches to regulation of importance to the chemistry sector, such as TSCA implementation, risk management plans, transparency in regulation, etc.

I am hoping your schedule will allow you to join us on September 13 and speak with, and meet, the assembled CTOs. Many thanks in advance for your consideration.

Glenn

## ACS CTO Summit

### Wednesday, September 12, 2018

- 2:00 – 5:30 PM      **CTO Meetings** – Optional, one-on-one sessions (rooms at ACS)
- 5:30 – 7:30 PM      **Welcoming Reception – CTOs & DC Policy Decision Makers**  
**Capital Hilton – Room TBD Updating invite List**
- 6:00 PM              **Welcome & Remarks – Thomas M. Connelly, Jr., ACS Executive Director & CEO**

### Thursday, September 13, 2018 (The Capital Hilton – Room TBD)

- 7:00 – 7:50 AM      **Breakfast**
- 7:50 AM              **Welcome & Legal Reminder** – Tom Connelly
- 8:00 – 8:45 AM      **Speaker: Confirmed:** Senator Steve Daines (R-MT) – chemical engineer serves on committees of important to the chemistry enterprise. Co-founder of Senate Chemistry Caucus)
- 9:00 – 10:15 AM      **Roundtable 1: Chemical Engineering in the 21st Century: Challenges and Opportunities**
- Dr. Gregory Symmes, Executive Director, NAS Division on Earth & Life Sciences (Confirmed)
  - Dr. Thomas Connelly, Jr.; Exec. Director & CEO, ACS (Confirmed)
  - CTO - TBD
- 10:15 – 10:30 AM      **Break**
- 10:30 – 11:45 AM      **Roundtable 2: Energy & Climate Panel**
- Shell Sky Scenario representative – Pending name from Shell
  - U.S. Department of Energy representatives (one of these agencies)
    - Advanced Research Projects Agency-Energy
    - National Renewable Energy Lab Rep.
  - Two CTOs - TBD
- 11:45 – 12:00 PM      **Group Photo**
- 12:00 – 1:30 PM      **Lunch & Speaker: Invited** – Dr. Nancy Beck, Deputy Assistant Administrator, EPA Office of Chemical Safety and Pollution Prevention

1:30 – 1:45 PM      **Break**

1:45 – 2:30 PM      **Roundtable 3: Future of the Innovation Ecosystem**

- **Confirmed** – Dr. Walter Copan, Undersecretary, U.S. Department of Commerce and Director, National Institutes of Standards and Technology
- Two CTOs
  - Alexa Dembeck, DuPont (**Confirmed**)
  - CTO TBD

2:30 – 3:00 PM      **CTOs discuss Future Opportunities/Next Steps & Adjournment**

**Subject:** RE: china

Nancy,

I would like to plan for 2 hours or so. I think they would be interested primarily in EPA's approach for assessment of chemical risk. The focus would be primarily on existing chemicals, but I think there would be interest in a brief overview of how new chemicals are addressed. We have been actively encouraging the Chinese to utilize a risk-based approach that considers exposure so to the extent that could be integrated into your discussions, it would be very helpful. I also think there would be interest in TSCA's approach to prioritization as a practical way to determine which compounds should be assessed first.

There is not a need for any silicones specific discussion. The delegation will be here to discuss the status of a collaboration where GSC, SCC (as a proxy for MEP), and CAFSI (a Chinese trade association that has silicone producers among its members) are undertaking a collective evaluation of the environmental risks associated with D4, but similar to their discussions with Environment Canada, the EPA discussions are intended to provide an overview of the US approach for chemicals evaluation and management. Thanks again for your help.

Karluss

Karluss,

Thanks for this. From your note, it looks like you are seeking a general talk from EPA to be provided to the Chinese delegation on our approach to risk evaluation for existing chemicals. Is that correct? No specific dialogue on silicones, new chemicals, or other topics? Would 30 minutes suffice?

I just want to be clear on what the ask is.

Thanks,

Nancy

Hi Nancy,

I hope you are enjoying your trip to the west coast. I trust that having spent time with the 'beautiful people' in sunny southern California will not have ruined your appreciation of Washington.

Attached is the letter that we sent to the Chinese delegation to invite them to the meeting in Washington. We were hopeful that the delegation could meet with you and others at EPA to allow them an opportunity to hear about EPA's risk-based approach to chemicals management. October 30<sup>th</sup> is the date that we were hoping the delegation could meet with EPA.

A similar meeting has been scheduled in Ottawa for the delegation to meet with folks at Environment Canada. Apologies for the short notice for this request. Thanks again for your help.

Hi Karluss,

I hope you are well. I must have copied down your number incorrectly as I can't seem to successfully return your call. I'm in Los Angeles through Friday but happy to chat next week. If you have anything you can send in writing about the meeting that would be helpful as I will need to run it through our international affairs office to get their input.

Regards,

Nancy

Hi Karluss,

I hope you are well. I must have copied down your number incorrectly as I can't seem to successfully return your call. I'm in Los Angeles through Friday but happy to chat next week. If you have anything you can send in writing about the meeting that would be helpful as I will need to run it through our international affairs office to get their input.

Regards,

Nancy

Steve,

Thank you very much for taking the time in September to spend the morning with myself and EPAT. I truly enjoyed touring the facility and learning about processes and procedures at the facility.  
I was greatly appreciative of the time and hospitality. If your travels take you to DC, I hope you will stop by to say hello.

Many thanks,  
Nancy

Dear Nancy and Anita,

I hope all is well. It was nice to spend time with both of you in Seoul.

Steve and I are sorry that you missed our presentation, so as promised, I am attaching our slides. I also have asked for an electronic copy of the slides presented by the Denmark Consumer Council on their ingredient disclosure application. Once I have it, I will forward it along.

All the best,  
Komal

**Subject:** TSCA

Hi Nancy – Years ago I chaired an SOT TSCA Task Force, which was regrettably sunset following passage of the law. There were several of us on the TF who thought SOT should continue as we had built some solid relationships and respect on the Hill related to the non-advocacy science we brought to the table.

My question – do you envision any opportunities/roles where science knowledgeable on toxicology, the law, and TSCA could play a role as there are oversight hearings, implementation continues to move forward, etc.? SOT's attitude over the past few years is that this is now in EPA's hands and they should allow EPA alone to do the implementation.

I'm not advocating one way or the other, but know there are some knowledgeable outside interested scientists and groups that would be willing partners/assistants to EPA if the need is there.

Welcome your thoughts and even better, if you'll be at SOT, could we meet for 30 minutes?

Regards,

Daland
